

AWESOME SHOES

SIZE FINDER™ PAPER RULER

1. PRINT THE RULER

Make sure your printer is set to either "100% scale" or "do not scale" for an accurate result.

2. PLACE THE PAPER RULER ON A HARD FLOOR

Placing the heel line against a wall will make measuring easier – you can fold the paper at the line.

3. POSITION THE FOOT

Place one foot onto the paper ruler and make sure the back of the heel lines up with the thick line. Stand normally, with equal weight on both feet.

4. MEASURE THE LENGTH

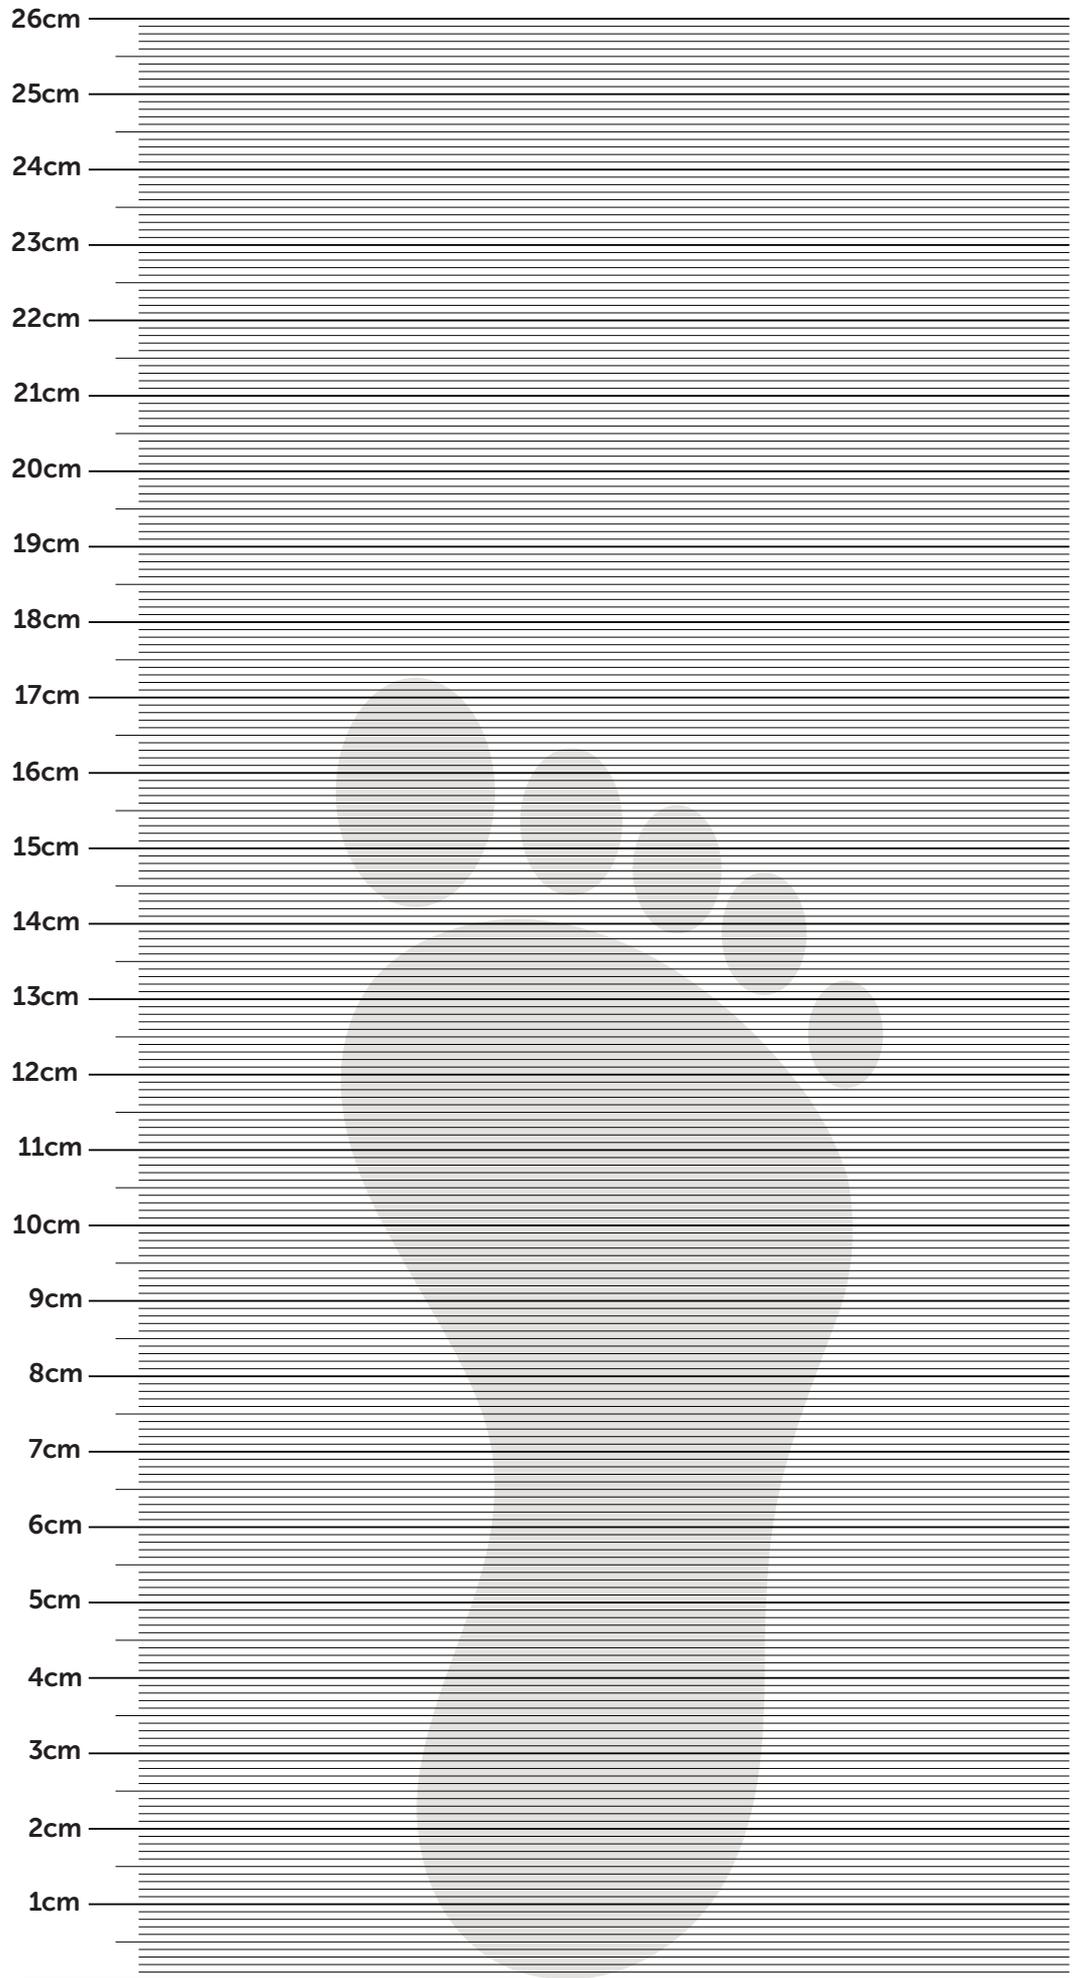

Take the centimetre measurement from the longest toe – no need to add any extra as we already account for growing room. Repeat for the other foot.

5. FIND THE RIGHT SIZE

Enter the largest foot length measurement into the Size Finder™ at awesomeshoes.com to find the recommended size.

Place a 2p coin above to check the paper ruler was printed to scale

PLACE BACK OF THE HEEL TO THIS LINE ↗
